**Notes:** (\*) The manufacturer and OEM applicant declare that these products are constructed using the same materials, components and processes as the tested types PE260, NRS 72 M300, NRS 60 M245. Further details on certified models are reported on the attachment. Technical data, materials and components description are into the indicated test reports. Any changes of the design, materials, components or processing may require the repetition of some of the qualification tests in order to retain type approval. The certification is performed on tested model as complete certification and retest performed according to IEC 61215 "Retesting guideline" for similarity with model NRS 60 M245 with differences in higher or lower power output (by 10%) in the identical package including size and using the identical cell process. The certification is performed on tested model as complete certification. This certificate is for type approval and based on voluntarily product test and with Factory Inspection. The Manufacturer Inspection is conducted by TÜV INTERCERT on the base of the internal procedures.
